The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 rejected under 35 U.S.C. 102(e) as being anticipated by Ito et al.

With respect to claim 1, Ito discloses a condensate demineralizer for demineralizing condensate in a nuclear power plant (see lines 37-40 of col. 2), comprising a mixed bed of a strongly acidic gel-type cation exchange resin (see lines 47-52 of col. 2 and lines 24-29 of col. 4) and a uniform particle size strongly basic porous anion exchange resin (see lines 22-48 of col. 5, especially line 39 which mentions DOWEX MSA-1).

Concerning claim 2, Ito et al disclose the anion exchange resin (DOWEX MSA-1) as having an average particle size of 500-1000 micron and a particle size distribution in which 95% or more of resin particles are within the range of the average particle size  $\pm$  100 micron.

Regarding claim 3, Ito et al disclose a method for demineralizing condensate in a nuclear power plant by using the condensate demineralizer of claim 1 or 2 (see lines 34-40 of col. 2).
